

# REMOVE SIGNS OF AGING WITH CO2 LASER SKIN RESURFACING

## Benefits of Fractional CO2 Laser Skin Resurfacing:

- Minimizes sun damage, age spots, freckles, enlarged pores, acne scars, wrinkles around the mouth and fine lines.
- Improves skin texture and evens skin tone.
- Stimulates collagen for firmer, more youthful skin.
- May help treat pre-cancerous skin lesions.
- Minimal downtime.

## SAY GOODBYE TO AGING SKIN

Fractional CO2 is the latest technology for facial rejuvenation. This cutting edge laser is excellent at reducing fine lines, improving texture, and tightening the skin. CO2 Laser Skin Resurfacing delivers total skin rejuvenation with a single treatment and with minimal downtime!

CO2 Laser Skin Resurfacing also offers the added benefit of stimulating the formation of new, underlying collagen for up to 6 months after the initial treatment. Helping skin to regain its youthful, plump & full appearance.

Premier Medical Group Dermatologist - Dr. Mays Al-Shaer is happy to offer her patients CO2 Laser Skin Resurfacing at our convenient Poughkeepsie location.
