

**PREMIER** *medical group*

December 15, 2017

Dear Patients and Friends of TLC Pediatrics,

We hope this letter finds you with a joyful heart. We are delighted to bring you the news of our decision to merge with Premier Medical Group of the Hudson Valley, P.C. effective January 1, 2018. TLC Pediatrics had its humble beginning seventeen years ago. Three founding partners made a decision to give the very best of themselves in caring for all children and adolescents regardless of race, socioeconomic status and health concern. This paramount mission blossomed into a practice that provides exceptional and sincere personalized care by building relationships with the families we serve. We are proud of our establishment.

Due to changes in health care, it has become increasingly challenging to remain a freestanding private practice. The goal of economic security led us to consider joining a larger enterprise. Our choice of Premier Medical Group was governed by our core values. We searched for a progressive company that models the same level of passion for delivering high quality services to patients, demonstrates fairness in all interactions, boasts competent and warm personalities in their physicians and staff, and accepts a wide range of insurances. We found these virtues in Premier Medical Group. It's a great match!

We expect the transition to be smooth. Same familiar locations. Same friendly faces. Same late weekday hours and weekend hours in the Poughkeepsie office. However, now patients will have access to expanded patient services, including lab and ultrasound that will allow us to provide even better continuity of care.

Please join us in our excitement as we join hands with Premier Medical Group to continue as the premier provider of pediatric care in the Hudson Valley.

Warm Regards,

The Physicians and Staff at TLC Pediatrics
