COVID-19 Vaccine Update

Dear Valued Premier Patient,

We urge you to get your COVID-19 vaccine as soon as possible and are contacting you with an update on the current status of vaccination at Premier Medical Group offices.

Where and when patients can get vaccinated is a fluid situation and completely determined by the New York State Department of Health (NYS DOH) which is responsible for creating the timeline and the eligibility for vaccine distribution in the state.

NYS DOH has begun a vaccination program for people in the 1B category which includes people over 65 years old, teachers and education workers, first responders, public safety workers such as police and firemen and public transit workers.

We have formulated plans to distribute vaccines to our primary care patients when the NYS DOH makes these vaccines available to us. Also, because the number of vaccinations and prioritization of patients to receive them is determined by the NYS DOH, vaccines will be available by appointment only and we will contact you as soon as vaccinations are available to us and you are eligible.

Please be assured that you will hear from Premier as soon as vaccines are given to us and you are within the eligibility guidelines.

We urge that you obtain your vaccination as quickly as possible if it is available to you through your county services: <https://am-i-eligible.covid19vaccine.health.ny.gov/>

Getting vaccinated against COVID-19 is one of the most important steps to protect yourself and your community.

Ready, Safe and Here for You.
